

## Nutrition

At Abidoodles we are committed to provide only the highest quality nutrition for pets. We have used several brands over the years but have found not one comparable to Life's Abundance. Nearly all commercially available premium brands have been recalled for contamination and included ingredients that are toxic to animals. Furthermore, there is a large amount of indigestible filler that provides no nutrition whatsoever and increases the quantity of food required to be fed and resulting in excessive stool. There is an excellent documentary outlining the deceptive nature and the truth about the commercial pet food industry titled PET FOOLeD.
